

INFORMATION SECURITY AND CONFIDENTIALITY

Policy Statement

This code is covered with top-level security controls and NDA protection.

Confidentiality

- All source code, configuration files, environment settings, and related artifacts are treated as confidential information.
- Access is restricted to authorized personnel only.

Security Controls

- Code is subject to top-level security review and protection measures.
- Sensitive configuration and environment data is handled in accordance with organizational security requirements.
- Production and non-production environments are managed under controlled access policies.

NDA Protection

- This code is covered by top-level non-disclosure agreement protection.
- Unauthorized disclosure, copying, reverse engineering, or distribution is prohibited.

Compliance

- All use of this code must comply with internal security policy, client requirements, and applicable confidentiality obligations.

This statement confirms that the code is covered with top-level security and NDA protections.
